Subject Index

Volume 24, 1991

Page numbers followed by (Abs) denote abstracts from the Seventeenth International Congress on Electrocardiology.

Action potentials. *See also* Late potentials
- body surface mapping for assessment of low-amplitude, 205
- effects of heart position and orientation in surface mapping (Abs), 290
- effects of aprindine on monophasic, 111
- micro-concealed in signal-averaged QRS complex (Abs), 279
- modifications in late in chronic myocardial infarction after myocardial revascularization (Abs), 279

Activation
- body surface mapping for assessment of low-amplitude potentials, 205
- implications of macroscopic source strength in cellular models, 99
- pseudo preexcitation syndrome, 263

Aging
- normal and abnormal cardiac electrical activity (Abs), 282

Ambulatory monitoring
- QT interval in healthy adults, 85
- three-lead Holter recording in diagnosis of ischemic ST changes, 155

Angina
- verapamil in Prinzmetal, 177

Anisotropy
- computer modeling of excitation and recovery, 1, 17, 33
- implications of macroscopic source strength in cellular activation models, 99

Anterior hemiblock
- reverse R wave progression in (Abs), 277

Aortic coarctation
- body surface mapping in long-term follow-up (Abs), 284

Aortic regurgitation
- ECG strain pattern as indicator of subendocardial ischemia (Abs), 291

Aprindine
- effects on monophasic action potentials, 111

Arrhythmia
- beat-to-beat QRST variability as marker of risk (Abs), 292
- distribution of QRST reflection areas in relation to, 197

Arrhythmogenic conditions
- computer modeling in simplified left ventricle, 33

Athletes
- tricuspid valve dysplasia with Kent accessory pathway, enhanced AV node conduction, and conduction disturbances, 71

Atrial evaluation
- fast Fourier transform analysis, 285

Atrial fibrillation
- segmental resulting in chronic atrial dissociation: case report, 185

Atrial hypertrophy
- giant T waves simulating in pheochromocytoma, 263

Atrioventricular node
- catecholamine-induced ventricular tachycardia initiating nodal reentrant tachycardia: case report, 191
- cocaine effects in dogs, 257

Baseline wander
- filter to suppress in ST-segment, 318

Body surface mapping
- correlation of ST-60 maps and T-201 scintigraphy, 284
- dipiridamol vs. 12-lead ECG in diagnosis of ischemia (Abs), 283
- display method differences in late potentials (Abs), 281
- effect of sudden cycle length and pacing site changes in canine QRST, 213

Body surface mapping (*Continued*)
filtered QRS duration in first month after acute myocardial infarction (Abs), 286
heart position and orientation effects (Abs), 289, 290
His-Purkinje system signals in, 221
lead fields associated to optimal linear discrimination (Abs), 287
normal and abnormal cardiac electrical activity in aging rats (Abs), 282
in post-aortic coarctation long-term follow-up (Abs), 284
QRST isoarea in diagnosis of myocardial infarction with left bundle branch block (Abs), 282
quantification of independent components (Abs), 287
signal-averaged for assessment of low-amplitude potentials, 205
in Wolff-Parkinson-White syndrome (Abs), 283
Brody effect, 339
Bundle branch block
QRST isoarea mapping in diagnosis of myocardial infarction complicated by left (Abs), 282

Calcium
modulation of diastolic depolarization in sheep, 349
Cardiac abnormalities
evanescence in HIV-positive men (Abs), 283
Cardiac arrest
electrophysiological mechanisms of cocaine-induced, 247
Case reports
AV nodal reentrant tachycardia initiated by catecholamine-induced tachycardia, 191
conduction defects with Kent accessory pathway and tricuspid valve dysplasia in athlete, 71
giant T waves simulating atrial hypertrophy in pheochromocytoma, 263
segmental atrial fibrillation resulting in chronic atrial dissociation, 185
Catecholamine-induced ventricular tachycardia
AV nodal reentrant tachycardia initiated by: case report, 191
Cellular activation models
implications of macroscopic source strength, 99
Chronic obstructive lung disease
prognostic value of ECG in cor pulmonale (Abs), 286
Coaractation of the aorta
body surface mapping in long-term follow-up (Abs), 284
Cocaine
AV nodal and His-Purkinje effects in dogs, 257
electrophysiological mechanisms in cardiac arrest, 247
Collision-induced changes
repolarization modulation by cycle length in canine heart, 43
Computed tomography
transitional zone evaluation by, 239
Conduction disturbances
intraventricular in canine myocardial infarction, lidocaine vs. pirmenol effects, 379
with Kent accessory pathway and tricuspid valve dysplasia in athlete: case study, 71
Cor pulmonal
prognostic value of ECG in chronic obstructive lung disease (Abs), 286
right ventricular hypertrophy in, 231
Coronary angioplasty
detection of myocardial ischemia by vectorcardiographic analysis (Abs), 278
Coronary artery disease
ST/HR slope and improved myocardial ischemia detection in exercise testing, 307
Coronary artery ligation
three-dimensional vectorcardiography bite analysis in dogs, 379
Coronary artery stenosis
discriminant value of ST depression in computerized exercise testing (Abs), 289

Defibrillation
effects of lidocaine verapamil, 299
Depolarization
calcium modulation of diastolic in sheep, 349
Digitization
by desktop optical scanner, 325
Dipiridamol body surface mapping. *See also* Body surface mapping
vs. 12-lead ECG stress-test diagnosis of ischemia (Abs), 283
Display methods
differences in body surface mapping of late potentials (Abs), 281

Electrical activity
of ventricular muscle and reoxygenation, 363
Electrical field properties
of cardiac muscle in myocardial infarction, 371
Electrocardiography. *See also* Body surface mapping; Vectorcardiography
ambulatory monitoring, QT interval in healthy adults, 85
diagnostic comparison of methods for reconstructing vectorcardiogram from ECG (Abs), 284
digitization by desktop optical scanner, 325
filter to suppress baseline wander in ST-segment, 318
generalized inverse problem (Abs), 292
hematocrit-induced variations (Abs), 285
myocardial infarct estimation from quantitative ST-segment elevation, 77
optimum duration of transtelephonic monitoring, 165
prediction of left ventricular mass, 121
prognostic value in cor pulmonale associated with COPD (Abs), 286
quantitative and vectorcardiography in postnatally developing rats, 53
transitional zone evaluation by cardiac computed tomography, 239

24-hour 12-lead in prethrombolytic localization of anterior myocardial infarction (Abs), 281
Electrotonic interactions
and T wave changes during repolarization (Abs), 288
Excitation
computer modeling in anisotropic myocardium, 1, 17, 33
pseudo preexcitation syndrome, 263
Exercise testing
computerized multivariate ST-segment/heart rate analysis, 129
dipiridamol body surface mapping vs. 12-lead conventional (Abs), 283
discriminant value of ST depression in coronary artery stenosis (Abs), 289
PET determination of exercise-induced ST depression (Abs), 288
ST/HR slope and improved myocardial infarction detection, 307
three-lead Holter recording in diagnosis of ischemic ST changes, 155
T-201 vs. ST-60 body surface mapping (Abs), 284

Fast Fourier transform analysis
in evaluation of atrial vulnerability (Abs), 285
Fibrillation
atrial segmental resulting in chronic atrial dissociation: case report, 185
Filtration
to suppress baseline wander in ST-segment, 318
Flecainide
ionic mode of action (Abs), 292

Generalized inverse problem (Abs), 292

Heart position/orientation
influences on body surface potentials, 290
influences on ventricular activation sequence calculation (Abs), 289
Heart rate
correlation of late potentials with decreased (Abs), 281
optimal recording interval in prognostic assessment in myocardial infarction (Abs), 277
QRS duration adjustment in QT correction for (Abs), 280
QT interval relationship in diagnosis of stress-induced myocardial ischemia, 145
ST-segment computerized analysis in exercise testing, 129
High-frequency stimulation
subthreshold and canine ventricular refractoriness, 63
His-Purkinje system
body surface mapping, 221
cocaine effects in dogs, 257
HIV-positive men
evanescence of cardiac abnormalities (Abs), 283

Holter monitoring. *See* Ambulatory monitoring
Hypertension
pulmonary and right ventricular hypertrophy, 231
Hypertrophy
giant T waves simulating atrial in pheochromocytoma: case report, 263

Intraventricular conduction
pirmenol vs. lidocaine effects in canine myocardial infarction, 379
Ischemia. *See* Myocardial infarction; Myocardial ischemia

Kent accessory pathway
with tricuspid valve dysplasia and conduction disturbances in athlete: case study, 71

Late potentials
correlation of appearance with decreased heart rate variability and narrowing frequency spectrum (Abs), 281
display method differences in body surface mapping (Abs), 281
early perfusion therapy after acute myocardial infarction (Abs), 279
modifications in chronic myocardial infarction after myocardial revascularization (Abs), 279
as predictor of mortality after acute myocardial infarction (Abs), 278
Left anterior hemiblock
reverse R wave progression (Abs), 277
Left bundle branch block
QRST isoarea mapping in diagnosis of myocardial infarction complicated by (Abs), 282
Left ventricle
computer modeling of excitation in anisotropic myocardium, 17
Letter
ventricular bigeminy and sinus QRS complexes, 295
Lidocaine
vs. pirmenol in canine myocardial infarction, 379
with verpamil in defibrillation, 299
Low-amplitude potentials
body surface mapping for assessment, 205

Macroscopic source strength in cellular activation models, 99
Micropotentials
concealed in signal-averaged QRS complex (Abs), 279
Mitral stenosis
right ventricular hypertrophy in, 231
Myocardial infarction
body surface mapping of filtered QRS duration (Abs), 286
cardiac electrical field properties, 371

Myocardial infarction (*Continued*)
clinical significance of terminal QRS abnormalities in inferior, 85
early perfusion therapy for late action potentials (Abs), 279
late potentials as predictor of mortality (Abs), 278
micropotentials concealed in signal-averaged QRS complex (Abs), 279
modification of late potentials in chronic after revascularization (Abs), 279
optimal recording interval in prognostic assessment of heart rate variability (Abs), 277
pirmenol vs. lidocaine in canine, 379
QRST isoarea mapping in left bundle branch block (Abs), 282
right ventricular hypertrophy and in pulmonary hypertension due to cor pulmonale and mitral stenosis, 231
significance of U wave polarities in previous, 169
size estimation from quantitative ST-segment elevation, 77
24-hour 12-lead ECG in prethrombolytic localization (Abs), 281
Myocardial ischemia
detection by vectorcardiographic analysis in coronary angioplasty (Abs), 278
dipiridamol vs. 12-lead ECG in diagnosis (Abs), 283
Holter three-lead monitoring of ST interval changes in treadmill testing, 155
PET determination of exercise-induced ST depression (Abs), 288
pseudoischemic T waves as electrophysiologic mechanisms (Abs), 286
QRST simulations in quantitation of regional (Abs), 290
QT interval/heart rate relation in diagnosis of stress-induced, 145
ST/HR slope and improved detection in exercise testing, 307
subendocardial in aortic regurgitation (Abs), 291
T-201 vs. ST-60 body surface mapping (Abs), 284
Myocardium
computer modeling of excitation and recovery in anisotropic, 1, 17, 33

Nitroprusside-suppressed T waves
in pheochromocytoma: case report, 263
Nodal reentrant tachycardia
initiated by catecholamine-induced tachycardia: case report, 191
Numerical expansion measurement technique
cardiac electrical fields in myocardial infarction, 371

Optical scanners
in ECG digitization, 325

Perfusion therapy
early for late action potentials after acute myocardial infarction (Abs), 279
Pheochromocytoma
nitroprusside-suppressed giant T waves in: case report, 263
Pirmenol
vs. lidocaine in canine myocardial infarction, 379
Positive emission tomography (PET)
in determination of exercise-induced ST depression (Abs), 288
Preexcitation
body surface mapping localization in Wolff-Parkinson-White syndrome (Abs), 283
Prinzmetal angina
verapamil in, 177
Pseudoischemic T waves
as electrophysiologic mechanism (Abs), 286
Pseudo preexcitation syndrome, 263
Pulmonary hypertension
right ventricular hypertrophy in, 231
Purkinje fibers
calcium modulation of diastolic depolarization in sheep, 349
Purkinje-His complex
body surface mapping, 221
cocaine effects in dogs, 257

QRS complex
micropotentials concealed in signal-averaged (Abs), 279
in ventricular bigeminy (letter), 295
QRS interval
adjustment for duration in QT correction for heart rate (Abs), 280
bite deformities in vectorcardiographic analysis after coronary artery ligation in dogs, 379
body surface mapping after myocardial infarction, 286
clinical significance of terminal abnormalities in inferior myocardial infarction, 86
relation between integral map and electrical axis (Abs), 291
signal averaging in healthy young population (Abs), 288
QRST deflection areas
distribution in relation to repolarization and arrhythmias, 197
QRST integral maps
beat-to-beat variability as marker of arrhythmia risk (Abs), 292
in diagnosis of myocardial infarction with left bundle branch block in rats (Abs), 282
effect of sudden cycle length and pacing site changes in canine, 213
QRST simulations
in quantitation of regional ischemia (Abs), 290
QT interval
correction for heart rate and QRS duration (Abs), 280

erroneous calculation due to U and terminal T wave overlap (Abs), 287
in 24-hour ambulatory recordings from healthy adults, 85
relation to heart rate in diagnosis of stress-induced myocardial ischemia, 145
Quantitative electrocardiography
and vectorcardiography in postnatally developing rats, 53

Recovery
computer modeling in anisotropic myocardium, 1, 17, 33
Reentry
imaging of sustained in isolated ventricular myocardium (Abs), 290
Refractoriness
canine ventricular and subthreshold high-frequency stimulation, 63
Reoxygenation
ventricular muscle activity effects, 363
Repolarization
computer modeling in anisotropic myocardium, 1, 17, 33
distribution of QRST reflection areas in relation to, 197
modulation and T wave changes due to electrotonic interactions (Abs), 288
modulation in collision-induced changes, 43
Revascularization
modification of late potentials in chronic myocardial infarction (Abs), 279
R wave
reverse progression in left anterior hemiblock (Abs), 277

Scintigraphy
Tl-201 vs. ST-60 body surface mapping (Abs), 284
Sodium nitroprusside-suppressed T waves
in pheochromocytoma: case report, 263
Spectrum narrowing
correlation with late potentials and decreased heart rate (Abs), 281
ST/HR slope
and exercise ECG detection of myocardial ischemia, 307
ST interval
Holter three-lead monitoring in treadmill testing, 155
Strain pattern repolarization
as indicator of subendocardial ischemia in aortic regurgitation (Abs), 291
Stress-induced ischemia. *See* Exercise tests
ST-segment
discriminant value of depression in coronary artery elevation as parameter in evaluating myocardial infarct, 77
filter to preserve accuracy and suppress baseline wander, 318
PET determination of exercise-induced depression (Abs), 288
ST-segment/heart rate
computerized analysis in exercise testing, 129
ST-60 surface mapping
vs. Tl-201 scintigraphy (Abs), 284
Subendocardial ischemia
in aortic regurgitation (Abs), 291
Sudden cardiac death
in cocaine-induced cardiac arrest, 247

Tachycardia
atrioventricular nodal reentrant initiated by catecholamine-induced ventricular tachycardia: case report, 191
Transitional zone
evaluation by cardiac computed tomography, 239
Transtelephonic ECG monitoring
optimum duration, 165
Treadmill testing. *See* Exercise testing
Tricuspid valve dysplasia
with Kent accessory pathway and conduction disturbances in athlete: case report, 71
T waves
changes due to electrotonic interactions in repolarization (Abs), 288
pseudoischemic (Abs), 286
QT interval estimation errors due to overlap with U waves (Abs), 287
sodium nitroprusside suppression in pheochromocytoma: case report, 263

Ultrasonography
fast Fourier transform analysis in evaluation of atrial vulnerability (Abs), 285
U waves
QT interval estimation errors due to overlap with terminal T waves (Abs), 287
significance of polarities in previous myocardial infarction, 169

Vectorcardiography
in detection of myocardial ischemia in coronary angioplasty (Abs), 278
diagnostic comparison of methods for reconstructing from ECG (Abs), 284
and quantitative ECG in postnatally developing rats, 53
three-dimensional after coronary artery ligation in dogs, 379
Ventricular activation. *See* Activation
Ventricular bigeminy
and sinus QRS complexes (letter), 295
Ventricular hypertrophy
prediction of left by ECG, 121
right in pulmonary hypertension due to cor pulmonale and mitral stenosis, 231

Ventricular muscle activity
reoxygenation effects, 363
Ventricular myocardium
imaging of sustained reentry in isolated (Abs), 290
Ventricular refractoriness
subthreshold high-frequency stimulation and changes in dogs, 63

Verapamil
with lidocaine in defibrillation, 299
in Prinzmetal angina, 177

Wolff-Parkinson-White syndrome
body surface mapping in preexcitation site localization (Abs), 283
